04 GET READY TO RIDE

If you have ordered your bike as a boxed delivery, please carefully follow the instructions below to ensure safe use following the build.

BUILD

- 1 Remove all parts from the box and dispose of the packaging. Keep the cardboard block, which you can use to stabilise the frame.

SET UP

The Wattbike Nucleus can accommodate any rider through our unique real ride setup. Use the corresponding adjustment levers to manipulate the saddle and handlebar positions to get the right fit for your members and clients.

STEP 1: SETTING THE SADDLE HEIGHT

STEP 2: SETTING THE SADDLE HORIZONTAL POSITION

STEP 3: SETTING THE HANDLEBAR POSITION

Alternatively, visit wattbike.com/GB/bike-fit to accurately replicate real ride bike figures and positioning onto the Nucleus.

BIKE FIT

01 BEFORE YOU START

02 TAKING MEASUREMENTS

05 Drop a plumb line down from the saddle at its 80mm width to the tape measure on the floor. The measurement at which the plumb line bisects the tape measure is Ax.

Ax*

05 PERFORMANCE TOUCHSCREEN

SERIAL NUMBER

Use this ID when connecting third-party apps. Click for bike information and advanced options.

NETWORK STATUS

For automatic updates and a fully connected user experience, ensure you are connected to a network.

HR

Train efficiently by connecting a heart rate monitor - simply tap the heart rate icon to do so.

BLUETOOTH

See how to connect to Wattbike Hub and third-party apps.

WORKOUTS

Access the world's best workouts. Categories include Endurance, Speed, HIIT and Cycling Simulations.

TESTS

Track, benchmark and analyse performance with Wattbike's accurate tests.

PLANS

Bring your Wattbike plan with you. Learn more here.

DEVICE HOLDER

HOME
Touch 'HOME' to return to the home screen.

HISTORY
Access session history, save workouts to your Wattbike Hub account, and keep track of usage here.

HELP
Access FAQs and tips regarding your Wattbike Nucleus.

LOG IN
Log in to a Wattbike Hub account for a more personalised experience and to save sessions.

INTERVAL BUILDER
Allow your clients and members to build their own custom interval workouts with this tool.

POWER BUTTON

QUICK RIDE
Don't want to follow a specific workout? Start an open session here.

PORTS
HDMI port, 1 micro USB for maintenance and diagnostics, USB port for device charging, audio jack.

06 GET CONNECTED

LINKING UP A HEART RATE SENSOR

The Wattbike Nucleus is compatible with all popular HR belts, and can be synced up either before or during a session. Simply tap the HR icon at the top of the screen to link up at any time.

CONNECTING TO THIRD PARTY APPS

Your Nucleus can connect to third party training apps such as The Sufferfest, Zwift and TrainerRoad through your phone or tablet. To do this, follow the below steps:

1. Enable Bluetooth or ANT+ on your device (phone, tablet or computer)
2. Open your preferred training app and navigate to the point of connecting your indoor trainer
3. Select the ID shown in the top left corner of the Performance Touchscreen, for example: 'WattbikeNucleus12345' or '12345'
4. The touchscreen will switch to a Quick Ride screen and display your Wattbike workout data
5. Wattbike workout data will be transmitted to your chosen third party app

You can connect to any training apps which support Bluetooth or ANT+*.

*To use third party apps, a mobile device needs to be connected to the Wattbike via Bluetooth or ANT+, and personal subscriptions to the app are also required.

CONNECTING TO A NETWORK

1. Swipe up from the bottom of the screen

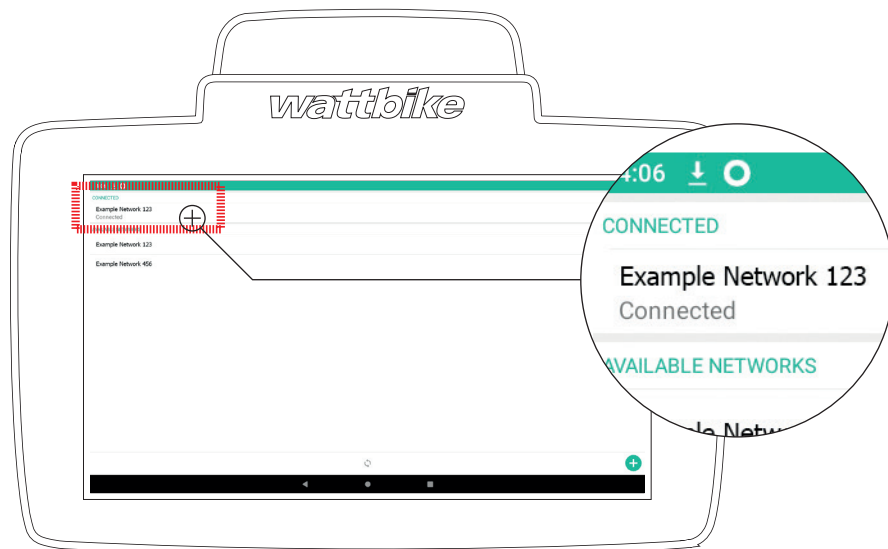

2. Select the dot at the bottom of the screen

- 3 Select the 'Settings' icon then 'Wi-Fi settings'

- 4 Select and connect to your network

07 MAINTENANCE

AFTER EACH SESSION

To ensure your Nucleus stays in good condition use a clean, soft cloth and non-abrasive liquid cleaner after each session to remove all sweat, dust, dirt and other substances.

REGULAR MAINTENANCE

Where necessary:

- Vacuum the floor under and around the Nucleus to prevent dust ingress
- Inspect the saddle and handlebar stem adjustment levers. Tighten and grease as necessary
- Check that the pedals are secure and fit for use. Replace straps and pedals if necessary
- Ensure that no sweat/liquid is pooling on the metalwork or covers
